PROFILE
.

I'm a driven and experienced Software Engineer that wants to help businesses reach and surpass their goals. I have a track record of assisting businesses in improving sustainability, lowering overall costs, and configuring the most efficient and productive manufacturing methods.

EXPERIENCE SUMMARY
.

Web app developer with 3+ years of experience working in a range of fast-paced, dynamic, and ever-changing, poised, professional, and product-oriented environments. Building and creating elegant APIs in PHP/Laravel, integrating SQL/NoSQL / client-server apps, and providing high-quality in-house tools to make mobile product creation, maintenance, and scaling easier are all examples of experience.

I experiment and build open-source projects (see my github page).

ENGINEERING SKILL SUMMARY
.

- Experienced with the Software Development Life Cycle (SDLC) process, which includes designing and implementing the software, debugging, fixing, and maintaining the software.
- Extensive experience in PHP/Laravel and web application design and implementation.
- Proficient skills in Test Driven Development (TDD) using PHPPest and PHPUnit.
- Skills at the expert level in developing web packages/libraries for PHP/Laravel to consume.
- Developed applications while being part of both Engineering and Marketing decisions, which helped me learn more and acquire knowledge about basic business processes.
